23494 7590 02/14/2008 DALY, CROWLEY, MOFFORD & DURKEE, LLP SUITE 301A 354A TURNPIKE STREET CANTON, MA 02021-2714			EXAMINER D'ANIELLO, NICHOLAS P	
			ART UNIT 1793	PAPER NUMBER
			NOTIFICATION DATE 02/14/2008	DELIVERY MODE ELECTRONIC

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

docketing@dc-m.com
amk@dc-m.com

Office Action Summary

Application No.

10/549,418

Applicant(s)

LEE ET AL.

Examiner

Nicholas P. D'Aniello

Art Unit

1793

Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 January 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1, 3-5 and 7-10 is/are pending in the application.
- 4a) Of the above claim(s) 7-10 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1 and 3-5 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 14 September 2005 is/are: a) ☐ accepted or b) ☒ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☒ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO/SB/808)
- Paper No(s)/Mail Date 9/14/2005
- 4) ☐ Interview Summary (PTO-413)
- Paper No(s)/Mail Date _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1 and 3-5, in the reply filed on January 18, 2008 is acknowledged.

Drawings

2. Figures 1 and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Leong et al (US Patent No. 5,811,751) in view of Kobsa (US Patent No. 6,163,010).

Leong et al. teaches a probe-positioning device consisting of a base machine (10) including a base frame (taken to be a stage unit on a working table). Wherein the stage

includes a translation stage (12) for X and Y adjustments, cables allowing for rotation of the chuck (16, rotating stage), a microscope mounting bridge (11, first supporting member), a microscope (22) and adjacent to the chuck (16) is a platen (17, second supporting member disposed on the working table) on which to position a plurality of probe heads (18 and 19, probe fixing units on a bracket). A multi-wavelength laser (24) is mounted toward the upper part of the stage unit on top of the microscope (22, effectively acting as the third supporting member disposed on the working table) (column 5, lines 42-64).

Leong et al. differs from the claimed invention because it does not teach the X, Y, and Z translation stages to be disposed on top of one another however it would have been obvious in the art that these stages could be separate stages on top of each other because Kobsa teaches a similar apparatus where the X-axis positioning stage (34), Y-axis positioning stage (36) and Z-axis positioning stage (38) are disposed on top of each other (column 5, lines 62-64). It would have been obvious to one of ordinary skill in the art that the inclusion of a separate stage for each orthogonal axis would give the user advanced control and precision in the movement of the work piece which is necessary when dealing with micron sized features.

5. Claims 3-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leong et al (US Patent No. 5,811,751) and Kobsa (US Patent No. 6,163,010) as applied to claim 1 above, and further in view of Ingle (US Patent No. 4,475,681).

Leong et al. and Kobsa teach a probe positioning and bonding device as applied to claim 1. Claim 3 differs from the references in calling for a pincette for the holding the probe. However, it would have been obvious in the art to employ a pincette for holding the probe because Ingle teaches a similar wire bonding apparatus where clamping arms (100a and 100b) are provided on a support arm (44, taken to be a bracket) and a wire clamping control solenoid (108) is provided to enable the clamping arms to pivot on an axis normal to the support arm (reciprocating mover) (column 7, lines 33-63). Furthermore, such clamping members would allow for the bonding to be effected with low impact force by selectively gripping the wire and linearly advancing in predetermined sequential and incremental movements during bonding (column 2, lines 42-63).

In regard to claim 4, as seen in figures 2-4 of Ingle, the probe fixing unit is disposed on a pivot plate (46, which would be considered the second supporting member in the apparatus of Leong et al.) and a coil compression spring (92) which is able to pivot (slidably move) the support arm (bracket) upwardly (z-direction) relative to the pivot plate (column 7, lines 9-23).

In regard to claim 5, the probe fixing unit of Ingle is connected to many adjusting members (control plate 66 and pivot plate 46) which enable it to pivot about the z-axis (pivot axis 72) and about a traverse pivot axis (48, x-direction) (column 6 line 37 - column 7 line 8). A stop screw (110) in the clamping arm (100a) is adjustable to selectively limit the maximum opening between the clamping fingers (column 7, lines 59-64) effectively restricting the open angle of the pincette. Although not explicitly taught, it would have been obvious to one of ordinary skill in the art at the time of

Art Unit: 1793

invention to employ grooves in the pincette of Ing1e to ensure a better grip and avoid crimping and/or damage to the fragile probes.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nicholas P. D'Aniello whose telephone number is (571)270-3635. The examiner can normally be reached on Monday through Thursday from 8am to 5pm (EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jerry Lorengo can be reached on (571) 272-1233. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
